

# Team Time process

# Challenge:

How to integrate a relevant Green&Blue Lane?

# Goal:

Create a relevant program, that answer the needs of H and OTH and will function in the long term

## First intervention

1. Leave the grass to grow.
2. Observe the natural path of pedestrian circulation
3. Symbolize it on site

### Collaboration with the municipality

- Include the drawings into the design  
Free nature

Hollendrecht - Google 3D

## Following intervention

Build elevated temporary paths  
(open construction site)

### Collaboration with Casa Jepie

Opportunity for encounters, events, opening the dialogue, gather workers skills.

- Contribute to valorisation of skills, empowerment  
Opportunity of expressions of needs and talks about the public spaces

Translate insights into drawings  
- Mas du Taureau / Bricologis

- Include insights in the design project  
Build a public facility in a low tech way (no big trucks, time, etc)

## Following intervention

Along the paths, create a pedagogical project:  
-> which animals could cross the paths?

Create ponds along the paths ? insects hostel?  
Bring sheep to cut the grass in some areas?

### Collaboration with schools, farms.

- Relevant program on public space to be confirmed with the design  
Density of nature, respect, education.

Urban Farm - Mas du Taureau / Bricologis - La Bergerie Urbaine

## Goal:

Encourage individual identity of the buildings

First intervention : How the facades can contribute in creating identity

- 1.Identify how residents use their apartments and what they need to adapt them
2. Propose an adapted facade for the building

**Collaboration with Eigen Haard**

Adapted facade on the design project

Included facilities for other than human on the facade design

Lacaton&Vassal-Bordeaux

Following intervention: how to improve the interiors

1. Talk to residents whether they need interior renovations
2. Guide residents for do-it-yourself (self-renewal) & help them

**Collaboration with ROC van Amsterdam**

Give residents new skills, financial autonomy

Use of natural materials

Les Compagnons Bâtisseurs

## Goal: Bring more liveliness to the courtyards

Following intervention: activate ground floors

1. Occupy a free ground floor apartment.
2. Discuss with the residents of the building block on which type of function they aim for.
3. Help the new occupant/function to adapt the space.

**Collaboration with Eigen Haard**

New program on ground floors

Make the community/entrepreneurs more visible

The new occupant of the space needs to work on a sustainable interest

Coeur du village-Montreal
